*Rubio*<sup>®</sup> HydroCream  
for wood & stone

A **wax-based** cream that **paints** and protects  
**wood, stone and other mineral surfaces**

## GET TO KNOW RUBIO® HYDROCREAM

Thanks to the success and many advantages of Rubio® WoodCream, we discovered that the product had so much more to offer. By combining our **20 years of in-house experience in chemical building products** and the results of multiple tests and research, it turned out that we could apply Rubio® WoodCream on other surfaces than wood, like stone and mineral surfaces.

So, we proudly present you the extended version of this product: **Rubio HydroCream**. The revolutionary Rubio HydroCream is a cream **based on wax emulsion** that gives **wood, stone and other mineral surfaces a covering look** and also makes it water-repellent. This results in a long-lasting and high-quality protection. Thanks to its cream structure, Rubio HydroCream is easy to apply on **vertical surfaces**.

Rubio HydroCream can also be used as a paint, so this product comes in handy for painters too.

Rubio HydroCream is available in 2 collections: **the Traditional Collection** and **the Scandinavian Collection**.
